Scott Turner is an adjunct assistant professor of management at the Kenan-Flagler Business School. His research and teaching interests are in strategic management and technology/innovation management. His current research focuses on two broad issues: (1) understanding why organizations employ organizational routines, and (2) understanding how organizational routines influence performance. Scott has particular interest in the role of organizational routines in processes of organizational/technological change. His dissertation examined temporal routines for generational product innovation in the computer software industry. His educational background includes a Ph.D. in business administration from the University of North Carolina at Chapel Hill, M. S. in industrial administration from Purdue University, and B. S. in civil engineering from Clemson University.
